Junior Full Stack Software developer (Java)

Fresher Full Stack Developer with experience and knowledge in software development, specializing in Java and React. Proficient in all phases of the software engineering lifecycle from analysis to testing. Demonstrated expertise in Java (8-17), Spring Boot, React, TypeScript, JavaScript, and cloud technologies (AWS, Azure). Adept at working in Agile environments, collaborating across teams to deliver high-quality solutions. Skilled in troubleshooting, code reviews, and maintaining high coding standards. Committed to continuous learning and staying current with industry trends.

SKILLS

Operating Systems: Linux, Mac OS, Windows

Java Technologies: Java 11, ANT, DOM, J2EE, Java 1.5/1.6/1.7/1.8, JavaBeans, JAXP, JDBC, JNDI, JSF, JavaFX, Swing, JSP, JSTL, JTA, JUNIT, Load Testing, Log4j, MVC, Servlets, Spring boot, Spring MVC, Spring REST, Web services (Rest/ SOAP), XML

Build/CI Tools: Jenkins, Maven, Gradle

Testing: JUnit, Postman, Randoop, Evosuite, Selenium

IDE: Android Studio, Eclipse, IntelliJ IDEA, NetBeans, Postman, Putty, Visual Studio Code, Visual Studio, XCode

Design Patterns: Builder, Command, Façade, Factory, Observer, Singleton, Proxy, Strategy

Design Tools: Figma, Draw.io

Web Technologies: Angular 8/7/6/4, Bootstrap, CSS, HTML, JavaScript Libraries, JSON, Node.js, React.js, TypeScript, XML

Frameworks: API Integration, Hibernate, JPA, Microservices, NPM, React Native, Spring, Spring Boot, Spring Core, Spring DATA, Spring JDBC, Spring MVC, Spring ORM, Struts

Web App Servers: Apache Tomcat, JBOSS

Cloud: AWS, Azure

Version Control/Project Management Tools: Asana, Confluence, CVS, Git, JIRA, Pivotal, Slack, SVN, TFS

Other Technologies: C/C++, Python

Methodologies: Agile, Scrum, Software Architecture, Software Development Life Cycle, Test Driven Development, Waterfall

Database: MongoDB, MySQL, Oracle, SQL Server, Neo4j

Soft Skills: Communication Skills, Decision-making, Leadership quality, Problem-solving, Self-motivated, Team-Player

EDUCATION

Bachelor Of Science in Computer Science B Sc. CS

York University • Toronto, ON, Canada • GPA: 7.15/9.00 • May 2021 - Aug 2024

High School Diploma (Grade 12) in Science

Shri Swaminarayan Mission, Surat, India • GPA: 9.54/10.00 • June 2020

High School Grade 10

Shri Swaminarayan Mission, Surat, India • GPA: 9.46/10.00 • June 2018

WORK EXPERIENCE

Freelance Data Annotation

Data Annotation Tech Inc. • Jan 2023 – Dec 2024

ROLES & RESPONSIBILITIES:

- Collaborated with AI research projects by accurately labeling large-scale datasets involving natural language and image data.
- Wrote and evaluated sample user prompts and responses for training generative AI models.
- Applied consistent QA guidelines to ensure data integrity and model fairness across diverse datasets.
- Utilized Java for tool scripting and automation of repetitive annotation tasks.
- Developed a React-based UI to streamline internal annotation workflows.
- Worked with AWS S3 for storing processed data and Google Cloud Functions for backend validation tasks.

Online Math Tutor

Self-Employed (Independent) • May 2022 – Dec 2024

ROLES & RESPONSIBILITIES:

- Delivered personalized tutoring sessions for high school and first-year university students in Algebra, Calculus, and Statistics.
- Created interactive lesson plans using online tools like Jamboard, Desmos, and GeoGebra.
- Leveraged strong communication skills to break down complex math concepts in a virtual environment.
- Maintained detailed progress reports and adjusted teaching strategies based on individual learning styles.
- Used Google Workspace tools (Docs, Meet, Sheets) to manage scheduling and lesson delivery.

Cashier/Sales Associate

ESSO, Toronto, ON • Sep 2021 – present

ROLES & RESPONSIBILITIES:

- Managed day-to-day sales transactions efficiently while delivering high-level customer service in a fast-paced environment.
- Operated POS systems and handled cash, debit, and credit payments with accuracy.
- Maintained inventory, restocked shelves, and ensured overall cleanliness and safety of the station.
- Provided assistance to customers with fuel pumps, in-store products, and basic vehicle maintenance supplies.
- Trusted with opening/closing duties and reconciling daily financial reports.

PROJECTS

York Sims Game | C#, Git, Unity, Graphics

Summer 2024

- Team project of game development. Worked as a developer and designer of the game scenes and mechanics.
- Unity-based simulation game designed to ease the transition of high-school graduates to first-year university life.
- The game features almost the entire Keele and Markham campus of York University, allowing students to play around and learn valuable information before starting their first semester.

Parent Chore System | Java, MySQL, Maven, Git, Swing GUI

Winter 2024

- Developed a full-stack desktop application for a customer who wants to assign chores to her children systematically.
- Java-based chore management system designed to streamline communication between parents and children regarding household chores.

- The system allows parents to create and assign chores, track completion status, and even organize friendly competitions among children.

Six Degrees of Kevin Bacon | *Java, Neo4j Graph Database, SpringBoot, Maven, Git*
Summer 2023

- Team project for the Software Design course.
- Find an actor's connection to Kevin Bacon in the movie world using this Java tool powered by Neo4j database. Discover the shortest cinematic paths and calculate Bacon numbers effortlessly.
- Extensive use of REST APIs
